Projects

BLOG APPLICATION   **GitHub**
Technologies Used: Python, Django, PostgreSQL

- Built a secure, full-stack blog platform with authentication, data protection, and scalability across environments.
- Implemented robust database security to ensure data integrity, access control, and privacy across application layers.
- Optimized scalability to handle traffic while maintaining stability and resource efficiency under usage conditions.

AI-BASED ELECTRICITY DEMAND PROJECTION   **GitHub**
Technologies Used: Python, Machine Learning, TensorFlow

- Developed an AI model for electricity demand forecasting with secure data integration to support scalable deployment.
- Improved prediction accuracy using advanced machine learning techniques applied to diverse regional power usage patterns.
- Ensured efficient processing with secure data handling practices for consistent model training and evaluation workflows.

Certifications

- **HackerRank:** Certified in Java Programming   **2023**
- **Udemy:** HTML, CSS, and JavaScript   **2024**
- **Oracle:** Cloud Infrastructure AI Foundations Associate (1Z0-1122-25)   **2025**
- **Cisco Networking Academy:** Python Essentials 1 and 2   **2025**
